Institut für Technische Thermodynamik, Elektrochemische Energietechnik  
Stuttgart

Master Thesis

# *Development of new potential anodic materials for Metal Supported-SOFC*

---

Torchietto Martina

**DLR supervisor:** Dr. Aitor Hornés Martínez

**Academic supervisor:** Prof. Antonio Barbucci

## Table of content

List of figures.....	4
List of tables.....	7
List of abbreviations .....	8
 Chapter 1 Fuel cell introduction.....	10
1.1 Advantages.....	11
1.2 Disadvantages .....	11
1.3 Fuel Cells vs. Combustion Engines.....	12
1.4 Fuel Cell types .....	14
1.5 Solid Oxide Fuel Cells.....	16
1.5.1 Electrolyte.....	22
1.5.2 Cathode.....	23
1.6 Anode.....	24
Perovskite-based anodes .....	26
 Chapter 2 Objectives and strategy of work.....	30
2.1 Objectives .....	30
2.2 Strategy of work .....	31
 Chapter 3 Experimental .....	32
3.1 Methods .....	32
3.1.1 X-Ray Diffraction .....	32
3.1.2 Scanning Electron Microscopy .....	33
3.1.3 Specific surface area .....	35

3.1.4	Dynamic light scattering .....	37
3.1.5	Electrochemical impedance spectroscopy.....	38
3.2	Chemical compatibility tests.....	41
3.3	Cell manufacturing .....	42
3.3.1	Suspension manufacturing .....	43
3.3.2	Wet powder spraying (WPS) .....	45
3.3.3	Sintering .....	47
3.4	Electrochemical tests.....	48
Chapter 4	Results & Discussion.....	51
4.1	Initial characterization .....	51
4.2	Chemical compatibility among materials.....	56
4.3	Electrochemical tests .....	59
4.4	Summary of Results.....	66
4.5	Conclusions .....	67
References	.....	68
Appendix	.....	78
Cathode development	.....	78
Cell manufacturing	.....	78
Cell A	.....	79
Cell B	.....	80
Cell C	.....	80
Results & discussion	.....	82
